

Vision

An organic village that provides public services and economic opportunities in an equitable manner with minimum negative impact on the natural ecosystem in order “to meet the need of both present and future generations”.

Goals

1. Healthy natural environment with minimum human interventions
 - a. To guide proper land use (forest, agriculture, settlement, grazing)
 - b. To meet the local housing demands through construction of buildings harmonious to nature (Safe and Sufficient Housing)
 - c. To maintain, manage and conserve the water resources and its cycle.
 - d. To reduce the fossil fuel consumption (through alternative energy sources and improvising existing practices)
 - e. To increase the agricultural productivity for ensuring food security
 - f. To abate vehicular traffic

2. a Just society
 - a. To foster the social interaction through community participatory activities
 - b. To reduce the gap between poor and rich.
 - c. To facilitate the gender equality and empower marginalized group
 - d. To facilitate the access to basic social services (health, education, communication and knowledge sharing)

3. Natural Resource based Economy
 - a. To facilitate local employment by promoting natural resource based activities
 - b. To supplement the existing economic activities with potential secondary activities

4. Culturally Rich
 - a. To sustain the intrinsic and instrumental value culture (ecological, social and economic sustainability)
